protecting your home

Please read this important information carefully as it provides some guidance on protecting and maintaining your home.

General maintenance of your home

Buildings in a sound condition will withstand all but the most extremes of weather. You can help maintain your home in a good state of repair by taking a few sensible precautions.

- Arrange to have your gutters, gullies and drains cleared regularly to allow water to be carried away quickly and efficiently. Gutter leaf guards are useful, especially if there are tall trees near your home.
- Low hanging tree branches or bushes could cause damage in high winds so consider having them cut back.
- Secure any loose garden items, such as tables and chairs.
- It is advisable to visually check the condition of the roof of your home including any garages. Look for cracked and broken tiles, damaged chimney pots or problems with pointing and get these repaired.
- Flat roofs have a limited lifespan and should be checked regularly for signs of damage.
- Visually check that your TV aerial and/or satellite dish are still secured.

Fire prevention

There are a number of safety measures that you can undertake to protect your home and family from the risk of fire. In the event of a fire, contact the fire service quickly and preferably from a neighbour's house.

- Placing a reliable smoke alarm outside bedrooms and near the kitchen will alert you in the early stages of fire. Your detector should be tested regularly.
- It is advisable to have extinguishers in the home.
- Avoid cooking whilst under the influence of alcohol.
- Never smoke in bed. Do not leave cigarettes unattended when lit and ensure they are properly stubbed out afterwards. Allow an ash tray to cool down and add water to ensure the contents are properly cooled before emptying.
- Never leave candles unattended when lit. Burn candles in a place where they are not likely to be knocked over.
- Never leave the stove or cooker unattended whilst cooking and ensure that it is switched off after you've finished using it.
- Be careful when cooking with hot oil as it can easily catch fire. Make sure you turn off the heat if the oil starts to smoke.
- Keep combustibles away from all heat sources; i.e. clothing, furniture, curtains, tablecloths and all flammable liquids. When cooking over a naked flame, be sure that loose clothing is not worn.
- Don't overload extension cords or plug sockets. Frayed or exposed wires, along with loose plugs, are a fire hazard. Ensure electrical wiring faults are assessed and repaired by a qualified electrician.
- Keep tumble dryers clear of lint and don't leave them running overnight or when you're out.
- Regular inspection and cleaning of chimney flues will prevent fires. It is recommended that chimneys be swept on a regular basis this can be as much as three times in the burning season (winter) but at least once per year. It is important to ensure embers are properly put out before you go to bed and always use a fire guard to protect against flying sparks from hot embers.
- Make regular safety checks around the house and plan exit strategies. Discuss the risks of fire with all family members, making sure that children are aware of at least two routes of vacating the property and of the dangers of hiding under the bed or in a wardrobe.

Security and crime prevention

To help reduce the risk of theft there are a few preventative measures you can undertake within your home.

- We strongly recommend that your external doors are strong, in good condition and secured to a high standard. Fitting a five lever mortice deadlock or extra sliding bolts will improve security. French doors should be fitted with mortice locks on the top and bottom of both doors. Ensure all windows are fitted with key-operated window locks.
- The siren box of security alarms will act as a visual deterrent to some extent. Security lights are also a good idea as they switch on at pre-set times or when they detect movement.
- Sturdy high fences and thorny hedges make a good deterrent.
- Store garden tools and ladders securely in your shed or garage, as these can be used to break into your home.
- Never hide a spare key outside and make sure that keys are not within easy reach of the letter box.
- Don't leave valuables in sight. Fitting blinds or net curtains will make it harder to see into your property.
- Whilst away from your property, lights with timers can be beneficial as your lighting will come on at regular intervals, making it look like someone is at home.
- If you have a trusted friend or relative checking your property whilst you're away, ask them to collect the post and move it away from the front door or out of the porch.
- Many thieves break into the same home a second time as it's likely stolen items will be replaced. Call in a locksmith to ensure that your home is fully secured and the point of entry is reinforced.

Heating and plumbing

Each year many homeowners suffer water damage. Here are some general tips to help protect your home and prepare for extreme weather conditions such as frost and snow.

- Ensure that the boiler and heating system are regularly serviced at least once a year by a registered professional.
- If your home is left unattended leave the heating on low, around 15 degrees celsius, to prevent pipes freezing in very cold weather.
- Insulating your loft will reduce heat loss from your home. The Energy Saving Trust recommends the minimum thickness of loft insulation should be 270mm.
- Ensure furniture isn't too close to your radiators and heaters to allow heat to circulate. Leaving loft covers or cupboard doors ajar will allow warm air to circulate the voids.
- Know where the water shut off valve (stop tap) is in the event of an emergency as it will help you to quickly isolate the supply. Labelling it will also help others to locate it.
- Water pipes, cold water tanks and taps in unheated or vulnerable places should be lagged to help prevent pipes freezing.
- We recommend that pipes are visually checked regularly. Plastic plumbing joints will degrade sooner than metal ones. Arrange to re-washer any dripping taps; if they freeze, they'll block your pipes.
- If you're going away for a while, ask a trusted friend or relative to check your home regularly to make sure that your pipes haven't burst or frozen and make sure they know where the stop tap is.
- Keep your drains clear - avoid putting any food waste or fat down the sink as this can cause a blockage.
- Regularly clear out basins, baths and shower drains to prevent blockages.

Our assurance to you

This policy is a contract between you the policyholder and HDI Global Specialty SE UK Branch.

This booklet, schedule and any notices should be read together as one contract. The proposal form, statement of fact or statement signed or agreed by you is the basis of the contract.

In return for payment by you of the premium, we will insure you against theft, loss, damage or legal liability which may occur during the period of insurance in accordance with the sections specified in the schedule, subject to the exclusions, conditions and endorsements of the policy.

Unless specifically agreed in writing between you and us this contract will be subject to English Law and the policy will be written and conducted in English.

Ensuring this policy meets your needs

To ensure that this policy meets your needs please take time to read this booklet and your schedule and check the information contained within the statement of fact or statement signed or agreed by you is accurate. If you completed a proposal form to arrange this policy it is important to ensure the information provided was correct. A copy of your documents can be provided on request.

The policy booklet explains what is and what is not covered, how we settle claims and other important information. The schedule shows the cover selected and the premium. Please keep your schedule with the policy booklet.

If there are any mistakes or you wish to make any changes, please contact the broker or intermediary that arranged this policy for you.

Cancellation

You have a statutory right to cancel your policy within 14 days from the day of purchase or renewal of the contract or the day on which you receive your policy or renewal documentation, whichever is later. This is known as the cooling off period.

If you wish to cancel and the insurance cover has not yet commenced, you will be entitled to a full refund of the premium paid. Alternatively, if you wish to cancel and the insurance cover has already commenced, you will be entitled to a refund of the premium paid, less a proportionate deduction for the time we have provided cover. For more details about cancelling your policy please see page 24 of this booklet.

Your responsibilities

Please ensure you answer all questions honestly and to the best of your knowledge when you first obtain, make amendments to and renew your policy. Failure to answer all questions honestly and to the best of your knowledge may result in the wrong terms being quoted, cancellation of your policy and your claim being rejected or not fully paid. In some circumstances your policy may become invalid.

It is essential to keep your home in a good condition and take reasonable steps to avoid theft, loss or damage. Your policy is intended to cover you against unforeseen events like fire or theft. It does not cover 'wear and tear' or gradual deterioration such as defective rendering, repointing chimneys or brickwork, general roof maintenance or damp and rot arising from any cause. Areas commonly prone to 'wear and tear' on a building include guttering, flat roofs, fascia boards and boundary walls. These should all be checked on a regular basis.

It is also your responsibility to prove any loss therefore we recommend that you keep receipts, valuations, photographs, instruction booklets and guarantee cards to help with any claim you make.

Changes to your circumstances

Almost certainly your needs will change, if they do, please let the broker or intermediary that arranged this policy know. An updated schedule will be sent to you each time an alteration is made to the cover.

If you have selected buildings insurance, you should make sure your sum insured remains adequate to rebuild your home, if you extend or make improvements to it, such as installing double-glazing, adding a fitted kitchen or conservatory.

If you have selected contents and personal possessions insurance, your cover is for replacement as new. Remember to make sure your sum insured remains adequate to replace your contents if you buy new items. Jewellery, articles of precious metal, clocks, watches, paintings, works of art, antiques and stamp, medal and coin collections often change in value. You should make certain that these types of items are insured for the correct amount at all times.

Other changes we need to know about

You must inform your broker or intermediary:

- within 7 days of planning any building work within the boundaries of your home;
- before you change your address;
- before any change of use or occupancy of the premises.

You must inform your broker or intermediary at the next renewal date if any of the following occur at any time throughout your current period of insurance:

- you or a member of your family ordinarily residing with you incur any County Court Judgments or other judgments relating to debt;
- you or a member of your family ordinarily residing with you are made bankrupt or involved with a company which becomes insolvent or goes into liquidation;
- you or a member of your family ordinarily residing with you have been convicted (or charged but not yet convicted) of a non-motoring criminal offence;
- you become aware that your property or a neighbouring property has suffered or is suffering from any subsidence, heave or landslip damage;
- you change your occupation.

A new schedule will be sent to you whenever you make a change to your insurance and each year before the annual renewal date so you can check that the cover still meets your needs.
